

# The Fourth Grade Times

This past week we have been reviewing basic geographical skills and information that the students will need to apply throughout the year during our Social Studies lessons. A map study guide will be given to your child to review this information. A quiz will be administered to the students on Friday, September 15th. They will not have to know how to spell the continents and oceans, as a word bank will be provided.

## The Chapter 1 Math Test on Place Value will be Administered on Wednesday, September 6th.

The following objectives will be tested.

- ☒ Write Numbers in Standard Form, Word Form, and Expanded Form.
- ☒ Compare and Order Numbers to 100,000
- ☒ Identify How Much More or Less One Number is than Another Number
- ☒ Find the Rule in a Number Pattern

### PLACE VALUE

Place value determines the value of a digit in a number, based on the location of the digit.

#### Don't Miss It!

**Monday, September 4th:**

Labor Day, No School

**Tuesday, September 5th**

Deadline for PTA Membership and Volunteer Forms

**Wednesday, September 6th**

Chapter 1 Math Test

**Monday, September 11th**

Cookie Dough Turn In Day

**Monday, October 9th**

No School for Students

**Friday, October 13th**

Camp Lutherlyn Field Trip

These skills are covered in the math textbook on pages 5 - 26. You may refer to these pages for further information on the tested skills.

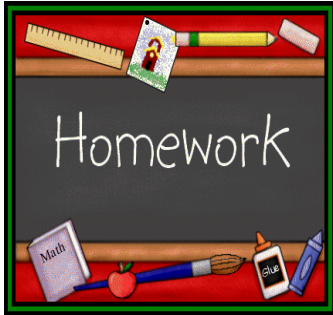

### Literacy Dates to Remember

Day 1: Thursday, August 31st — Week 2 Lessons Began

Day 6: Friday, September 8th — Week 2 Lessons End —  
Spelling, Comprehension, Grammar, and Vocabulary will be assessed on this day.

Homework Club Sign-Ups are available for 4th, 5th, and 6th grade students. This program is held Monday through Thursday from dismissal until 3:50 p.m. If you are interested in registering your child for this program, the paperwork was included in last evening's Curriculum Night folder.

**Homework must be completed nightly. This includes the signing of your child's assignment book. Please refer to the Curriculum Night packet for information on my classroom homework policy. If you have further questions, please contact me. Thank you.**

Just as understanding letter sounds is fundamental to the ability to read, a quick recall of math facts is the foundation to future math learning. That's why teachers in the primary and elementary grades spend so much time practicing basic addition, subtraction, multiplication, and division facts.

Students must be practicing their multiplication and division facts nightly at home to reinforce the daily math instruction. Assessments will be administered at school to track each student's individual progress.

I am sure that with the proper practice and time, all of the students will master their facts. Here are some websites that have digital and/or printable resources for you to use at home.

The West View PTO provides funding for many of the wonderful activities here at our school. This includes, but is not limited to, field trips, assemblies and WV carnival day. Cookie dough fundraising information to support these programs was sent home with your child. Please consider supporting the PTO, if you are able.

# SCIENCE

The students were engaged in active learning as they worked in cooperative groups to identify, extract, categorize, and compare the various seeds of fruits and vegetables.
